To anyone who still cares about the direction of our USA,

This letter is to ask why! Why does no one care about good moral values anymore? Why does no one believe in the basic Ten Commandments? Don't you remember, thou shall not kill and thou shall not tell a lie? These Commandments I believe are also part of today's judicial system, we know them better as Laws. Is it still against the Law to commit murder? Isn't it against the Law to lie on the stand? I cannot comprehend how lawmakers, politicians and "people of power" refuse to listen to their constituents. I don't understand how music and movies that violate the very system we base out entire lives on is allowed to be played with no resistance. Yet, I don't have the right to listen to music that has a positive message. I really struggle with the idea that Joe Blow down the street, who hates America and her laws, can hear music and watch movies promoting hate, murder, violence, disrespect and murder. He can hear and watch anything promoting his same Anti-American beliefs and he can do this legally PROTECTED by the same system he hates! Yet, bring my beliefs into the judicial system and all of a sudden these words are taboo. Mentioning God's name, teaching a positive message, expressing genuine concern and love for each other should be the reason why we exist not a distant memory of the "good ole days." I would just like to know why Christian radio is even being threatened when there are enough people in jail and sitting on death row who have come forward to say that if God had been in their lives their victims would still be alive! Wow! I have two young kids and if some of their peers were believers of any kind of faith that promoted good behavior and respect for others, I can guarantee you there would be far less office referrals and kids suspended. This letter is to ask that you please protect my right to have Christian Radio on the air so that I can live in my USA listening to what I want. After all, isn't that my right too? I

believe in and abide by the United States of America and her laws
and I too should have the right to hear and watch what I want.

Thank you,

Cynthia Martinez
